

Firms Create End-to-End Provider of Data Management Products and Services

Greenwood, Indiana; January 26, 2009 — Integrated Document Management Solutions (IDMS) and Holt, Sheets and Associates (HSA) today announced a new joint venture: Open Portal Solutions (OPS).

OPS is a comprehensive, end-to-end provider of data management products and services. It provides government and private-industry clients with Modifiable Off-The-Shelf (MOTS) products to meet their unique business needs, as well as custom software development, hosted solutions, an integrated customer service/technical support help desk and expert project management resources.

OPS President David Kaelin explained that “OPS is rare in today’s business world because it’s born of two very successful and financially strong companies that are currently engaged with clients across the United States. This new joint venture enables us to provide a more efficient use of products, resources and senior-level staff to offer an increased array of products and services to existing and future clients.”

“This change will be transparent to existing IDMS and HSA clients. They’ll see no change in contacts, support or key personnel. The only difference is that they’ll enjoy a greater breadth of products and streamlined service,” added Kaelin.

OPS is headquartered in Greenwood, Indiana in the former Holt, Sheets and Associates offices. Satellite offices are located in Fishers, Indiana; Frankfort, Kentucky; and Nashville, Tennessee.

About IDMS

Formed in 1993, IDMS is a technology services company that is known as “the On company” because they are always on-site, on-time and on-budget.

They have built their reputation on delivering enterprise turn-key solutions to public and private organizations. IDMS has thrived by delivering technology solutions that help organizations gain cost savings and improve business processes while increasing the quality of services and the productivity of employees.

IDMS is committed to its clients’ success. Their proven capabilities to provide complete solutions delivery help them reduce clients’ cost, increase clients’ performance, and put their clients on top of their markets.

About HSA

Established in 1993 as Sheets Enterprises, HSA is a business and technology management consulting firm that provides effective solutions to its clients’ most difficult problems. HSA’s approach is simple, yet effective:

Help - Help client clearly identify the problem.

Solve - Solve the problem through synthesis of People, Process and Technology.

Achieve - Achieve the desired result. (Delivering Results. Eliminating Excuses.)

In its commitment to long-term partnerships with its clients, HSA maintains a knowledge base and pool of senior resources with expertise in Enterprise Systems Integration, Systems Architecture, Business Process Development & Re-engineering, Business & IT Strategy Alignment and Program Project Management.
